

Glovius - Modern CAD Viewer

Frequently Asked Questions (FAQs)

Product FAQs -

Q: What is Glovius?

A: Glovius CAD viewer supports CATIA, NX, STEP, IGES, Pro/ENGINEER and Creo, SolidWorks, Inventor and Solid Edge files. Take accurate measurements, cut dynamic sections, and compare differences between models and export to 3D PDF, STL and Glovius Mobile.

Q: Which formats does Glovius support?

A: Glovius supports 36 of the most popular 3D & 2D file formats.

CAD formats

- CATIA V5 (CATPart, CATProduct)
- Pro/ENGINEER and Creo Parts and Assembly files (prt, asm)
- SolidWorks (sldprt, sldasm)
- Inventor (ipt, iam)
- NX Parts and assemblies (prt)
- JT
- SolidEdge (par, asm, pwd, psm)
- RHINO (3dm)

Graphical formats - Autodesk 3D Studio (3DS), Wavefront OBJ (obj), VRML (wrl, vrm), CGR, Collada (dae)

Neutral formats - STEP (stp, step), IGES (igs, iges), STL

Other formats - Parasolid (x_t, x_b, xmt, xmt_txt), 3D PDF

2D File formats - CATDrawing, DWG, DXF

Q: Does Glovius support 2D formats?

A: Yes. Glovius supports CATIA CATDrawings. DWG and DXF formats.

Q: What are the system requirements for installing Glovius?

A: Operating Systems (32 & 64 bit) – Windows 7, Windows 8 and 8.1.
Monitor – 1280 X 1024 or higher resolution with support for 32-bit color
RAM – 4GB or more recommended.

Q: Is Glovius available on Mac OS X?

A: Sorry. Glovius is not available on the Mac.

Q: Does Glovius support silent installation with SCCM for deployment?

A: Yes. Extract Glovius installer and use Glovius.msi file for SCCM for deployment.

Q: Does Glovius support multiple languages?

A: Yes. Glovius supports English, Deutsche, Français, 日本語, Español, Português, 中文 and 한국어 languages. The language can be changed from the Glovius language settings under “Help > Settings > General”.

Licensing FAQs –

Q: Which licensing models are supported by Glovius?

A: Glovius is available as Annual Subscription, Node-locked and Floating licenses.

Q: What is the difference between a node-locked & a floating license?

A: A node-locked license is a single computer license. A floating license is a network license.

Q: What is a node-locked license?

A: Glovius node-locked licenses are permanent licenses for use on one computer. The license never expires and is tied to one computer. The license is generated using machine’s MACID (host id). For convenience, the MACID is also listed in the Glovius “About” dialog.

Q: What is a floating license?

A: Glovius floating license is a network license meant to be installed on a server that allows you to use the license on multiple computers. You still need to install Glovius on each computer you wish to use.

The license is checked out from the server to use Glovius. After closing Glovius, the license is returned to the server, available for checkout by other users.

Floating license allows multiple users to utilize the license, but one floating license can be used by only one person at a time. For multiple people to use Glovius at the same time, multiple floating licenses are required. These are referred to as “seats”- if only one floating license is purchased, only one seat is available to be checked out at a time.

Q: Can I transfer my Glovius license to another machine?

A: Yes. It is possible to transfer your permanent Glovius license to another machine.

Q: How does Glovius subscription works?

A: Subscription licenses are node locked licenses with a one year validity. They are affordable options to permanent licenses. There are two subscription options available.

- Glovius Lite annual subscription is available for \$360/year per license
- Glovius annual subscription if available for \$480/year per license

To see details of plans, visit the Glovius [Online Store](#).
